

## Contents

### 1 Examination of the Eye

- 1.1 General Considerations
- 1.2 Preliminary Observations
- 1.3 History Taking
- 1.4 Examination Procedure
- 1.5 Other Tests
- 1.6 Vision Testing
- 1.7 Cytology
- 1.8 Bacteriology/Virology
- 1.9 Additional Diagnostic Testing

### 2 Which Part of the Eye is Affected?

- 2.1 Globe and Orbit
- 2.2 Lacrimal Drainage System
- 2.3 Eyelid
- 2.4 Third Eyelid
- 2.5 Conjunctiva
- 2.6 Cornea and Sclera
- 2.7 Anterior Chamber
- 2.8 Iris
- 2.9 Lens
- 2.10 Vitreous Body
- 2.11 Fundus

### 3 Problem Oriented Approach

- 3.1 Epiphora
- 3.2 Eye Redness
- 3.3 Opacity of the Eye
- 3.4 Ocular Pain

### 4 Ocular Emergencies

- 4.1 Preliminary Investigation and Ocular Examination
- 4.2 Ocular Pain
- 4.3 Corneal Ulcers/Injuries/Chemical Burns
- 4.4 Anterior Uveitis
- 4.5 Lens Induced Uvetis, Rupture of the Lens Capsule
- 4.6 Lens Luxation
- 4.7 Glaucoma
- 4.8 Ocular Media Opacity
- 4.9 Changes in Globe's Color/ Symmetry/ Shape
- 4.10 Anisocoria
- 4.11 Orbital Cellulitis/ Abscess, Masticatory and Extraocular Muscles Myositis
- 4.12 Ocular Trauma
- 4.13 Ocular Proptosis
- 4.14 Ocular Discharge
- 4.15 Sudden Blindness

### 5 Appendix

- 5.1 Drug list – Topical Preparations
- 5.2 Breed-Specific Eye Disorders
- 5.3 Abbreviations
- 5.4 Supply Sources
- 5.5 Literature
- 5.6 Index

DVD – 75 min of education instruction on examination procedures and selected ophthalmic surgeries.

Part 1: Examination of the Eye

- Slit Lamp Examination
- Tonometry
- Indirect & Direct Ophthalmoscopy
- Blood Pressure Measurement
- Schirmer Tear Test
- Flurescein Staining
- Tear Film Break-up Time
- Menace Response
- Pupillary Light Reflex
- Dazzle Reflex
- Cotton Ball test

Part 2: Surgeries

- \* Prolaps of third eyelid gland
- \* Entropion
- \* Conjunctival Transplant (Flap)
- \* Cataract with IOL Implantation
