

Content

Chapter 1 Introduction to Small Animal Physiotherapy

David Levine, Darryl Millis

1.1	What are the Goals of Physiotherapy?	2
1.2	What are the Benefits of Physiotherapy?	2
1.3	When should Physiotherapy be Applied to Animals?	3
1.4	What are the Future Applications for Small Animal Physiotherapy?	3
1.5	Animal Physical Therapy Associations Around the World	4

Chapter 2 Basic Concepts of Physical Therapy

Franck Forterre

2.1	Definition	6
2.2	What should be done Why	6
2.2.1	Bone	8
2.2.2	Joints	9
2.2.3	Ligaments	11
2.2.4	Tendons	11
2.2.5	Muscle	13
2.2.6	Nerves	13

Chapter 3 Pathophysiology of Pain

Sabine Tacke, Julia Henke

3.1	Basic Concepts	18
3.1.1	Can Pain Be Useful?	18
3.1.2	From the Induction to the Perception of Pain	19
3.1.3	Pain Memory	19
3.1.4	Inhibitory Pain Control Systems	20
3.2	Segmental Innervation and Effect	20
3.3	Pain Classification	21
3.4	Pain Assessment	22
3.4.1	Acute Pain	22
3.4.2	Chronic Pain	25
3.5	Pain Management	26
3.5.1	Analgesics	26
3.5.1.1	Balanced Analgesia (Multimodal Therapy)	26
3.5.1.2	Integrated Analgesia	30

Chapter 4 Examination of the Physical Therapy Patient

Barbara Bockstahler, Dragan Lorinson, Karin Groefslinger

4.1	Initial Examination	34
4.1.1	History	34

4.1.2	Clinical Examination	35
4.1.3	Posture and Gait	35
4.1.4	Palpation of the Limbs and Trunk at a Stance	37
4.1.5	Specific Tests for Assessment of the Back	38
4.1.6	Palpation of the Limbs in Recumbency	39
4.1.7	Additional Tests	41
4.2	Follow-up Examinations	44
Chapter 5 Physiotherapy – What and How		
<i>Barbara Bockstabler, Darryl Millis, David Levine, Marion Mueller</i>		
5.1	Methods of Physiotherapy	46
5.1.1	Massage Therapy	46
	<i>Barbara Bockstabler</i>	
5.1.1.1	Effects of Massage	46
5.1.1.2	Indications	47
5.1.1.3	Contraindications	48
5.1.1.4	Massage Techniques	48
5.1.1.5	Conducting a Massage Session	55
5.1.2	Therapeutic Exercises	56
	<i>Darryl Millis, David Levine</i>	
5.1.2.1	The Goals of Therapeutic Exercises	56
5.1.2.2	Passive Exercises (PTE)	57
5.1.2.3	Assisted Therapeutic Exercises (AssisTE)	62
5.1.2.4	Active Therapeutic Exercises (ATE)	64
5.1.3	Electrical Stimulation	69
	<i>Barbara Bockstabler</i>	
5.1.3.1	Theoretical Principles	69
5.1.3.2	Biological Effects	71
5.1.3.3	Indications	72
5.1.3.4	Precautions/Contraindications	73
5.1.3.5	Electrode Placement	73
5.1.3.6	Dosage	74
5.1.3.7	Transcutaneous Electrical Nerve Stimulation (TENS)	75
5.1.3.8	The Use of TENS in Practice	77
5.1.4	Therapeutic Ultrasound	88
	<i>Barbara Bockstabler</i>	
5.1.4.1	Definition	88
5.1.4.2	Practical Aspects of Therapeutic Ultrasound	89
5.1.4.3	Dose	90
5.1.4.4	Indications	91
5.1.4.5	Contraindications and Adverse Effects	92
5.1.4.6	Technical Aspects of Ultrasound	92
5.1.5	Extracorporeal Shock Wave Therapy (ESWT)	96
	<i>Marion Mueller</i>	
5.1.5.1	What are Shock Waves?	96
5.1.5.2	Technical Aspects	96
5.1.5.3	Mechanism of Action	97
5.1.5.4	Indications	97
5.1.5.5	Contraindications	98
5.1.5.6	Treatment Procedure	98

5.1.5.7	Treatment Frequency	100
5.1.5.8	Side Effects of ESWT	100
5.1.6	Aquatic Therapy	101
	<i>Barbara Bockstahler</i>	
5.1.6.1	Fundamental Principles	101
5.1.6.2	Indications for Aquatic Therapy	103
5.1.6.3	Contraindications	103
5.1.6.4	Aquatic Therapy Modalities	104
5.1.6.5	Standing Exercises	105
5.1.6.6	Walking Exercises	107
5.1.6.7	Outdoor Exercises	109
5.1.7	Thermotherapy	110
	<i>Barbara Bockstahler</i>	
5.1.7.1	Superficial Heat	110
5.1.7.2	Cryotherapy	113
5.2	Handling	115
	<i>Barbara Bockstahler</i>	
5.2.1	The Home Environment	115
5.2.1.1	Nonslip Flooring	115
5.2.1.2	Sleeping Area	115
5.2.1.3	Bed and Sofa	115
5.2.1.4	Feeding Area	115
5.2.2	Car Travel	115
5.2.3	Walking Aids	116
5.2.4	Foot Ulcers in the Claw and Dorsal Foot Region	116
5.2.4.1	Foot Protection	116
5.2.4.2	Optimal Walking Surfaces	117
5.3	Role of the Owner in Physical Therapy	117
	<i>Barbara Bockstahler</i>	
5.3.1	Home Treatment Modalities	118
5.3.1.1	Thermotherapy	118
5.3.1.2	Massage	118
5.3.1.3	Therapeutic Exercises	119
5.3.1.4	Electrical Stimulation	119
5.3.1.5	Sample Home Treatment Protocols	120
5.4	DEVELOPING A TREATMENT PLAN	121
	<i>Barbara Bockstahler</i>	
5.4.1	What are the Objectives of Physical Therapy?	121
5.4.2	Developing an Appropriate Treatment Protocol	122
Chapter 6 Indications, Classification according to location		
	<i>Barbara Bockstahler, Darryl Millis, David Levine, Eva Mlacnik</i>	
6.1	Preliminary Remarks	126
6.1.1	Postoperative Joint Rehabilitation	128
	<i>Barbara Bockstahler</i>	
6.1.1.1	Osteochondritis dissecans (OCD) – an Overview	128
6.1.1.2	OCD: Shoulder	133
6.1.1.3	Elbow Dysplasia	137
6.1.1.4	OCD: Stifle Joint	140
6.1.1.5	OCD: Tarsus	143

6.1.1.6	Hip – Total Hip Replacement	146
6.1.1.7	Hip – Femoral Head Osteotomy	151
6.1.1.8	Stifle	156
6.1.1.9	Patella Luxation	168
6.1.2	Tendons and Ligaments	173
	<i>Barbara Bockstahler</i>	
6.1.2.1	Insertion Tendinopathies	173
6.1.2.2	Superficial and Deep Flexor Tendon Rupture	175
6.1.2.3	Contracture of the Flexor Tendons of the Forelimb	176
6.1.2.4	Achilles Tendon Rupture	177
6.1.2.5	Traumatic Hyperextension of the Carpus	179
6.1.3	Luxation Injuries	180
	<i>Barbara Bockstahler</i>	
6.1.3.1	Overview	180
6.1.3.2	General Treatment Plan	181
6.1.3.3	Hip Luxation	183
6.1.3.4	Elbow Luxation	189
6.1.4	Fractures	192
	<i>Barbara Bockstahler</i>	
6.1.4.1	Humerus, Radius and Ulna, Femoral and Tibial Fractures	192
6.1.4.2	Pelvic Fractures (Conservatively and Surgically Managed)	196
6.1.4.3	Articular Fractures	201
6.1.4.4	Additional Treatments for Specific Indications – Shoulder	204
6.1.4.5	Additional Treatments for Specific Indications – Elbow	205
6.1.4.6	Additional Treatments for Specific Indications – Stifle	206
6.1.4.7	Spinal Fractures and Luxation	207
6.1.5	Spondylosis Deformans and Spondylarthritis	209
	<i>Barbara Bockstahler</i>	
6.1.6	Arthritis	213
	<i>Barbara Bockstahler</i>	
6.1.6.1	General Treatment Plan	213
6.1.6.2	Treatment of the Shoulder	218
6.1.6.3	Treatment of the Elbow	219
6.1.6.4	Treatment of the Carpus	221
6.1.6.5	Treatment of the Hip	223
6.1.6.6	Treatment of the Stifle	224
6.1.6.7	Treatment of the Tarsus	225
6.1.7	Neurological Diseases	227
	<i>Barbara Bockstahler</i>	
6.1.7.1	Intervertebral Disk Disease – Overview	227
6.1.7.2	Disk Diseases – Conservatively Managed	233
6.1.7.3	Disk Diseases – Surgically Managed	236
6.1.7.4	Cauda Equina Compression Syndrome – Conservatively Managed	239
6.1.7.5	Cauda Equina Compression Syndrome – Surgically Managed	243
6.1.7.6	Wobbler Syndrome (Cervical Spondylomyelopathy) – Conservatively Managed	244
6.1.7.7	Wobbler Syndrome – Postoperative Rehabilitation	245
6.1.7.8	Degenerative Myelopathy	248
6.1.7.9	Fibrocartilagenous Infarction	251
6.1.7.10	Brachial Plexus Lesions	252

6.1.8	Muscle Disorders	255
	<i>Barbara Bockstahler</i>	
6.1.8.1	Contracture of the Infraspinatus Muscle	255
6.1.8.2	Contracture of the Quadriceps Muscles	259
6.1.8.3	Muscle Tension	263
6.2	Feline Physical Rehabilitation	263
	<i>Darryl Millis, David Levine</i>	
6.2.1	Factors Involved in Feline Rehabilitation	263
6.2.2	Passive Range of Motion (PROM)	264
6.2.3	Stretching	266
6.2.4	Active Exercises	266
6.2.4.1	Chasing a Flashlight or Laser Light Beam	266
6.2.4.2	Can Opener	267
6.2.4.3	Toys	267
6.2.4.4	Following a Treat	268
6.2.4.5	Wheelbarrowing	268
6.2.4.6	Dancing Exercises	269
6.2.5	Transcutaneous Electrical Nerve Stimulation (TENS) for Cats	270
6.2.5.1	Indications for TENS in Cats	270
6.2.5.2	Procedure	270
6.2.5.3	Peripheral Ischemic Neuropathy Due to Tilting Window Entrapment	270
6.3	Rehabilitation of the Geriatric Patient	272
	<i>David Levine, Darryl Millis</i>	
6.3.1	The Geriatric Patient	272
6.3.2	The Effects of Aging	272
6.3.2.1	Metabolic Effects	272
6.3.2.2	Physical Effects	272
6.3.3	Factors Affecting Lifespan	272
6.3.4	Systems that may be Affected by the Aging Process	273
6.3.5	Maintaining Quality of Life	274
6.3.6	Pain Management in the Geriatric Dog	275
6.3.7	Nutritional Considerations (see also chapter 6.4 and Appendix)	275
6.3.8	Environmental Modifications	276
6.4	Weight Management in Physiotherapy	276
	<i>Eva Mlacnik</i>	
6.4.1	Risk Factor Obesity	276
6.4.2	Energy Requirement – Basic Concepts	276
6.4.2.1	Factors Influencing the Energy Requirement	276
6.4.2.2	Weight Maintenance – Energy Requirements for Healthy Dogs and Cats	277
6.4.3	Weight Management Strategies for Normal Weight Dogs and Cats in Physiotherapy	277
6.4.4	The Overweight Dog or Cat	278
6.4.4.1	When is a Dog or Cat too Fat?	278
6.4.4.2	Possible Consequences of Obesity	281
6.4.5	Weight Management Strategies for Overweight Dogs	281
6.4.5.1	Weight Loss Plan	282
6.4.5.2	Frequent Problems – Tips	282
6.4.6	Formulas for Calculation of Energy Requirement for Dogs	285

Chapter 7 Economic Aspects of Physical Therapy

Barbara Bockstahler

7.1	Financial Aspects	288
7.2	Positive "Side Effects" of Physical Therapy	289
7.3	Integration of Physical Therapy in Daily Practice Management	289
7.4	Sample Fee Schedules	290

Appendix

Dietary Management	294
Sources	297
References	298

Contents of the DVD (45 Minutes)

Physiotherapeutic examination 7 Minutes
Examination at a Stance, Examination while Sitting or Lying Down, Examination at Different Gaits, Palpation of the Limbs and Spinal Column including Specific Diagnostic Tests

Massage 7 Minutes
Goals of Massage, Stroking, Kneading, Friction, Circular Pressure, Shaking, Percussion, Conducting a Massage Session

Exercise Therapy 12 Minutes
Goals of Exercise Therapy, Passive Range of Motion Exercises: Stretching, Flexor Reflex Exercise, Bicycling Movements in Lateral Recumbency and Standing Position, Weight Shifting, Swissballs/Physiorolls, Balance Boards, Wheelbarrowing, Dancing, Shake Hands Exercise

Electrotherapy 10 Minutes
Goals of Electrotherapy, Programs and Settings, Electrode Placement for a) Local Treatment, b) Segmental Treatment, c) Muscle Stimulation, Treatment Procedure, Electrotherapy in Cats, TENS/NMES Home Treatment

Extracorporeal Shock Wave Therapy (ESWT) 4 Minutes
Goals of ESWT, Settings, Treatment Procedure for the Hip, Treatment of Other Joints

Underwater Treadmill 5 Minutes
Goals of Underwater Therapy, Settings, Bicycling Movements, Hopping, Weight Shifting, Walking on the Underwater Treadmill, Swimming on the Underwater Treadmill, Treatment Procedure
